Subject: Canadain border
Docket No. 03-080-2

April, 7, 2004

Dear Sir or Ma'am:

I am writing in response to the opening of Canadian border to live cattle. I do not support the opening since the finding of two cows that tested positive to B.S.E. in and from Canada.

As a cattle rancher our family takes pride in our cow herd. We work hard to keep them healthy. It worries us that B.S.E. positive cattle can freely cross the border at anytime and go directly into our food chain.

I am also angry that Canadian officials are already claiming that the border will be open soon. This was broadcasted before the end of the comment period.

This issue with B.S.E. is a health issue not a political issue. This is the United States of America not United States of Canada, Mexico & America. We stand in support of a closed border.

Sincerely,
Christ Taylor
