I, a veterinarian authorized thereto by the Veterinary Administration of South Africa hereby certify that the milk/milk products described in A1 above :

2. The product(s) was legally imported into South Africa under cover of an import permit which required compliance with the conditions outlined below:

2.1. The products were processed at an officially approved processing plant and subjected to one of the following processes:

- (a) The milk or milk-based products originated from areas where no outbreaks of Foot and Mouth Disease has occurred in the previous 12 months and where no vaccination against foot and mouth disease was carried out in the previous 12 months,
- (b) ultra high temperature (UHT) (UHT - minimum temperature of 132 °C for at least one second); or
- (c) pasteurised 72°C for at least 15 seconds or 60°C for 30 minutes
- (d) heat sterilized for 30 minutes at a pressure of 100Kpa and/or
- (e) an acidification process such that the pH value is lowered and kept below 6 for at least one hour.

3. While in South Africa the product was handled, wrapped and packed in an establishment approved and recommended for export to Namibia and; stored in a hygienic manner taking necessary precautions to avoid contact with products of a lower status. The standards in the establishment are considered equivalent to the requirements for the registration of local dairy establishments approved for export.

4. The product are considered not to contain any harmful additives and are unconditionally passed fit for human consumption.

5. The consignment was loaded in clean vehicles/containers suitable for the product.
