FOURTEENTH REPORT

2-12-97

MINISTERIO DE AGRICULTURA, PESCA Y ALIMENTACION
DIRECCION GENERAL DE SANIDAD DE LA PRODUCCION AGRARIA
Subdirección General de Sanidad [illegible]

C/ VELAZQUEZ, 147
28001 MADRID

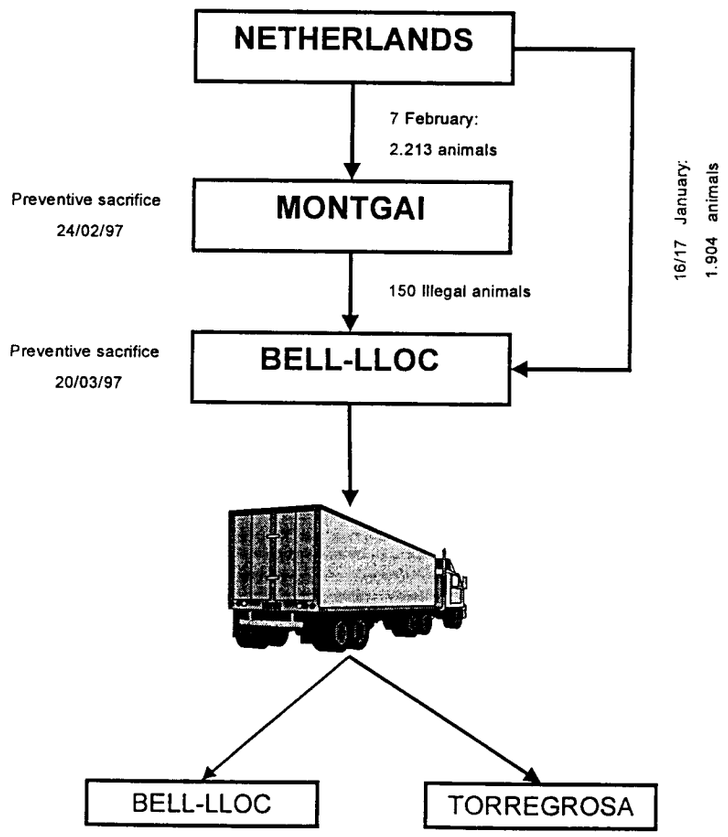
Origin of the disease in Spain in 1997.

From the farm sited in the municipality of Montgai (Lérida), where animals were preventively sacrificed on 24.02.97 because several consignments arrived from the Netherlands (one of those from the same origin and more or less at the same date than the ones wich originate outbreaks in Italy), 150 porcine animals moved illegally to a farm in the municipality of Bell.lloc (Lérida).

The farm that received these 150 animals belongs to the same enterprise than the one in Montgai and received 1904 animals from the Netherlands on 16 and 17 of January. Previously, a permit to full the farm with 2000 animals was applied for.

When these irregularities were observed, linked to epidemiological reasons, the animals were sacrificed on 20.03.97, some samples were taken and the serological tests were negatives.

The farms of Bell.lloc and Torregrosa, where the outbreaks 97/1 and 97/2 were registered, are epidemiologically related to the former in Bell.lloc and Montgai, because they belong to the same enterprise and they have the same services for retiring death animals.



Sacrifice carried out on: 15/04/97

Samples from these holdings were sent to the CSF Community Reference Laboratory of Hannover, which confirms that CSF virus (Type 2.1) is the same as the one occurred in Paderborn (Germany) and Holland at the beginning of 1997.

New reported oubreaks (November).

97/68

Autonomous Community	CATALUÑA
Affected Province	LLEIDA
Affected Municipality	AGRAMUNT
Comarca	URGELL
Disease under suspection	CLASSICAL SWINE FEVER
Date when first sick or suspected animal appeared	Suspection was reported on 03/11/97
Is it a primary or secondary outbreak?	its a secundary one.
Number of outbreaks	68/97
Number of affected farms	1
Affected species	Swine
Per outbreaks or farm (1):	
Farm population, per species	739 fattening pigs.
Number of affected animals, per species	50
Number of death animals per species	4, not included in the census
Number of sacrificed animals per species	All the farm population
Number of destroyed animals per species	All the farm population
Number of destroyed carcasses per species	
Date of disease confirmation	04/11/97
Diagnostic method used	ELISA for antigen detection. Waiting to be confirmed by the diagnosis methods set out in Directive 80/217/ECC.
Center where tests are carried out	Health Livestock Laboratory in LLeida
Control measures adopted	Measures such as the ones stated by Directive 80/217/EEC, establishing measures in relation with CSF.
Distances to other receptive farms	In a radius of 3 Km. 43 farms with a census of 2.497 breedings and 8.975 fattening pigs have been calculated.
Date of sacrifice	04/11/97
Origin of the animals	Spain

Disease under suspection	CLASSICAL SWINE FEVER
Date when first sick or suspected animal appeared	Suspection was reported on 19/11/97
Is it a primary or secondary outbreak?	Its a secundary one.
Number of outbreaks	73/97
Number of affected farms	1
Affected species	Swine
Per outbreaks or farm (1):	
Farm population, per species	2 boars, 32 breeding sows, 115 piglets and 63 fattening pigs.
Number of affected animals, per species	2 breeding sows and 115 piglets
Number of death animals per species	9 piglets and 1 fattening pig.
Number of sacrificed animals per species	All the farm population
Number of destroyed animals per species	All the farm population
Number of destroyed carcasses per species	
Date of disease confirmation	21/11/97
Diagnostic method used	ELISA for antigen detection. Waiting to be confirmed by the diagnosis methods set out in Directive 80/217/ECC.
Center where tests are carried out	Health Livestock Laboratory in Lleida
Control measures adopted	Measures such as the ones stated by Directive 80/217/EEC, establishing measures in relation with CSF.
Distances to other receptive farms	In a radius of 3 Km. 51 farms with a census of 1.275 breedings and 9.140 fattening pigs have been calculated.
Date of sacrifice	21/11/97
Origin of the animals	Spain

EPIDEMIOLOGICAL INVESTIGATION FROM OUTBREAK NUMBER 3 TO 73.

NUMBER OF OUTBREAK: **3/97**

The holding is located in the municipality of Torregrossa being the same municipality for outbreak number 2.

The probably source of the disease into the holding is dead animals collection process, carried out by the dead animals Collection Firm.

Another posible relationship is with the Feed Supplier Company, which is the same firm supplying the holding of outbreak number 5, notificated the suspicion on the same date 15/04/97.

NUMBER OF OUTBREAK: **4/97**

The holding is located in the municipality of Torregrossa being the same municipality for outbreak numbers 2 and 3.

The probably source of the disease into the holding is through the services given by the integrated enterprise related to the holding which is the same of outbreak number 2.

NUMBER OF OUTBREAK: **5/97**

The holding is located in the municipality of Torregrossa being the same municipality for outbreak numbers 2, 3 and 4.

The probably source of the disease into the holding is the proximity to holding outbreak number 2 located at 100 metres.
Another possible relationship is the dead animals collection Firm.

NUMBER OF OUTBREAK: **6/97**

The holding is located in the municipality of Torregrossa, being the same municipality for outbreak numbers 2, 3, 4 and 5.

The probably source of the disease into the holding is the dead animals collection process, carried out by the Dead Animals Collection Firm.

NUMBER OF OUTBREAK: **7/97**

The holding is located in the municipality of Bell-Lloc d'Urgell, being the same municipality for outbreak number 1.

The probably source of the disease into the holding is yet investigating.

NUMBER OF OUTBREAK: **8/97**

The holding is located in the municipality of Torregrossa, being the same municipality for outbreak numbers 2, 3, 4, 5 and 6.
The probably source of the disease into the holding is through the services given by the integrated enterprise related to the holding which is the same of outbreak numbers 2 and 4.

In the same way, the source could be the proximity to holdings suffering the disease, specifically with outbreak number 4 located at 700 metres and outbreak number 2 located at 1.000 metres.

NUMBER OF OUTBREAK: **9/97**

The holding is located in the municipality of Torregrossa being the same municipality for outbreak numbers 2, 3, 4, 5, 6 and 8.
The probably source of the disease into the holding is through the services given by the integrated enterprise related to the holding which is the same of outbreak number 5.
In the same way, the source could be the dead animals collection process, carried out by the dead animals collection firm.

NUMBER OF OUTBREAK: **10/97**

The holding is located in the municipality of Torregrossa, being the same municipality for outbreak numbers 2, 3, 4, 5, 6, 8 and 9.

The probably source of the disease into the holding is through the services given by the integrated enterprise related to the holding which is the same of outbreak numbers 5 and 9.

NUMBER OF OUTBREAK: **11/97**

The holding is located in the municipality of Torregrossa, being the same municipality for outbreak numbers 2, 3, 4, 5, 6, 8, 9 and 10.

The probably source of the disease into the holding is through the services given by the integrated enterprise related to the holding which is the same of outbreak numbers 5, 9 and 10.

In the same way, the source could be the proximity to holdings suffering the disease, specifically outbreak number 8 located at 100 metres.

NUMBER OF OUTBREAK: **12/97**

The holding is located in the municipality of Montgai.

The possible source of the disease into the holding is the entry on the 10 of April, 1997 of animals coming from holding outbreak number 13.
On the 22 april was notificated the suspicion of both outbreak numbers 12 and 13.

NUMBER OF OUTBREAK: **13/97**

The holding is located in the municipality of Montgai, being the same municipality for outbreak number 12.
The possible source of the disease into the holding is the proximity to Ramón Pique's holding, stamped out as preventive measure on the 24 February, after the entry of pigs coming from Holland.

NUMBER OF OUTBREAK: **14/97**

The holding is located in the municipality of Bell-Lloc d'Urgell, , being the same municipality for outbreak numbers 1 and 7.
The possible source of the disease into the holding is the proximity to holding outbreak number 1 located at 500 metres.

NUMBER OF OUTBREAK: **15/97**

The holding is located in the municipality of Linyola.
The probably source of the disease into the farm is through the firm supplying feed to the holding, being the same who gives technnical services in the holding outbreak numbers 5, 9, 10 and 11.

NUMBER OF OUTBREAK: **16/97**

The holding is located in the municipality of Motgai, being the same municipality for outbreak numbers 12 and 13.
The probably source of the disease could be due that both this farm and holding outbreak number 13 have the same people working in.

NUMBER OF OUTBREAK: **17/97**

The holding is located in the municipality of Linyola, being the same municipality for outbreak number 15.
The probably source of the disease into the holding is through the services given by the integrated enterprise related to the holding which is the same for holdings outbreak numbers 2, 4 and 8.

NUMBER OF OUTBREAK: **18/97**

The holding is located in the municipality of Bell-Lloc d'Urgell, being the same municipality for outbreak numbers 1, 7 and 14.

The probably source of the disease into the holding is the proximity to holding outbreak number 1 located at 100 metres, likewise because shares technnical services together with feed supplying with the mentioned holding.

NUMBER OF OUTBREAK: **19/97**

The holding is located in the municipality of Linyola, being the same municipality for outbreak numbers 15 and 17.

The probably source of the disease into the holding is through the services given by the integrated enterprise which is the same for holdings outbreak numbers 2, 4, 8 and 17.

NUMBER OF OUTBREAK: **20/97**

The holding is located in the municipality of Torregrossa, being the same municipality for outbreak numbers 2, 3, 4, 5, 6, 8, 9, 10 and 11.
The probably source of the disease into the holding is the proximity to holding outbreak number 5 (located at 20 metres) and holding outbreak number 2 (at 100 metres), likewise shares technnical services with the integrated enterprise for holdings outbreak numbers 5, 9, 10 and 11.

NUMBER OF OUTBREAK: **21/97**

The holding is located in the municipality of Torregrossa, being the same municipality for outbreak numbers 2, 3, 4, 5, 6, 8, 9, 10, 11 and 20.
The probably source of the disease is the proximity to holdings outbreak numbers 4, 8, 10 and 11, likewise shares technnical services given by the integrated enterprise with holdings outbreak numbers 5, 9, 10, 11 and 20.

NUMBER OF OUTBREAK: **22 /97**

The holding is located in the municipality of Bell-Lloc d'Urgell, being the same municipality for outbreak numbers 1, 7,14 and 18.
The probably source of the disease is a truck with registration number L-7797-U and belonging to the integrated enterprise runned on 08/04/97 through holding outbreak number 1, and later on 09/04/97 through holding outbreak number 22, likewise the technical services from the integrated enterprise went to holding outbreak number 18 on 21/04/97 and to holding outbreak number 22 on 25/04/97.

NUMBER OF OUTBREAK: **23 /97**

The holding is located in the municipality of Linyola, being the same municipality for outbreak numbers 15, 17 and 19.

The probably source of the disease is the proximity to holding outbreak number 19, also shares technnical services with the same integrated enterprise for holding outbreak number 3.

NUMBER OF OUTBREAK: **24 /97**

The holding is located in the municipality of Torregrossa, being the same municipality for outbreak numbers 2, 3, 4, 5, 6, 8, 9, 10, 11, 20 and 21.
The probably source of the disease is the proximity to holdings outbreak numbers 2, 5 and 20.

NUMBER OF OUTBREAK: **25 /97**

The holding is located in the municipality of Linyola, being the same municipality for outbreak numbers 15, 17, 19 and 23.
The probably source of the disease is the proximity to holding outbreak number 17.

NUMBER OF OUTBREAK: **26 /97**

The holding is located in the municipality of Linyola, being the same municipality for outbreak numbers 15, 17, 19, 23 and 25.
The probably source of the disease is the proximity to holding outbreak number 23, likewise shares the services from the integrated enterprise as holding outbreak number 25.

NUMBER OF OUTBREAK: **27 /97**

The holding is located in the municipality of Torregrossa, being the same municipality for outbreak numbers 2, 3, 4, 5, 6, 8, 9, 10, 11, 20, 21 and 24.
The probably source of the disease is that shares the services from the integrate enterprise together with holdings outbreak numbers 3 and 23, also the firm suppliying feed stuffs is the same for holdings outbreak numbers 5, 9, 10, 11, 20 and 21.

NUMBER OF OUTBREAK: **28/97**

The holding is located in the municipality of Torregrossa, being the same municipality for outbreak numbers 2, 3, 4, 5, 6, 8, 9, 10, 11, 20, 21, 24 and 27.
The possible source of the disease into the holding is the proximity to holdings outbreak number 3 (600 metres), outbreak number 10 (500 metres) and outbreak number 21 (500 metres); in the same way shares the services of the integrated enterprise of holding outbreak number 7.

NUMBER OF OUTBREAK: **29/97**
The holding is located in the municipality of Dels Alamus.
The possible source of the disease is the proximity to outbreak 4 (800 metres) and because the holding is near to a highway used by the trucks that had been worked in the previous outbreaks occurred in the zone outbreak numbers 4, 8, 11 and 21.

Another probably source is through the feed trucks belonging to the integrated enterprise.

NUMBER OF OUTBREAK: **30/97**

The holding is located in the municipality of Torregrossa, being the same municipality for outbreak numbers, 2, 3, 4, 5, 6, 8, 9, 10, 11, 20, 21, 24, 27 and 28.
The probably source of the disease is the proximity to outbreak 27 (550 metres).
Another possible source of the disease into the holding is through the services given by the integrated enterprise related to this holding, which is the same for the holdings outbreak numbers 2, 4, 8, 17 and 19.

NUMBER OF OUTBREAK: **31/97**

The holding is located in the municipality of Torregrossa,, being the same municipality for outbreak numbers, 2, 3, 4, 5, 6, 8, 9, 10, 11, 20, 21, 24, 27, 28 and 30.
The probably source of the disease into the holding is through the services given by the integrated enterprise related to this holding, which is the same for the holdings outbreak numbers 2, 4, 8, 17, 30 and 19.

NUMBER OF OUTBREAK: **32/97**

The holding is located in the municipality of Juneda.
The probably source of the disease is the entry of animals coming from the outbreak number 33.
This farm had fattening animals and received piglets from the farm later declared as outbreak number 33. The farmer was cotitular of this farm.
Another possible source of the disease into the holding is through the services given by the integrated enterprise related to this holding, which is the same for the holdings outbreak numbers 3, 23 and 27.

NUMBER OF OUTBREAK: **33/97**

The holding is located in the municipality of Torregrossa, being the same municipality for outbreak numbers 2, 3, 4, 5, 6, 8, 9, 10, 11, 20, 21, 24, 27, 28, 30 and 31.
The probably source of the disease into the holding is through the services given by the integrated enterprise related to this holding which is the same for the holdings outbreak numbers 3, 23, 27 and 32.

NUMBER OF OUTBREAK: **34/97**

The holding is located in the municipality of Linyola, being the same municipality for outbreaks 15, 17, 19, 23, 25 and 26.
The probably source of the disease into the holding is through the services given by the integrated enterprise related to this holding, which is the same for the holdings outbreak numbers 25 and 26.

NUMBER OF OUTBREAK: **35/97**

The holding is located in the municipality of Bell-Lloc d'Urgell, being the same municipality for outbreak numbers 1, 7, 14, 18 and 22.
The probably source of the disease is the proximity to outbreak 7 (800 metres), being the approaching road to both farms common and also vehicles going to farm outbreak number 35, pass close by holding outbreak number 7.
Another possible source could be through the technnical services of the integrated enterprise with outbreak number 22.

NUMBER OF OUTBREAK: **36/97**

The holding is located in the municipality of Juneda being the same municipality for outbreak 32.
The probably source of the disease is through the technical services of one of the two enterprises working for the holding, due that both firms have attended holdings outbreak numbers 21, 30 and 31 have occurred recently.

NUMBER OF OUTBREAK: **37/97**

The holding is located in the municipality of Els Alamús, being the same municipality for outbreak number 29.
The possible source of the disease into the holding is through the technnical services of the enterprise working for the holding, because the mentioned enterprise has attended holdings outbreak numbers 17, 19, 30, 31 and 36 have occurred recently.

NUMBER OF OUTBREAK: **38/97**

The holding is located in the municipality of Torregrossa, being the same municipality for outbreak numbers 2, 3, 4, 5, 6, 8, 9, 10, 11, 20, 21, 24, 27, 28, 30, 31 and 33.
The probably source of the disease into the holding is the proximity to outbreak number 30 (230 metres).
Another possible source of the disease into the holding is through the services given by the integrated enterprise related to the holding which is the same for outbreak numbers 27, 32 and 33.

NUMBER OF OUTBREAK: **39/97**

The holding is located in the municipality of Bell-Lloc d'Urgell, being the same municipality for outbreak numbers 1, 7, 14, 18, 22 and 35.
he probably source of the disease into the holding is through the services given by the integrated enterprise related to the holding which is the same for outbreak numbers 27, 32, 33 and 38.
Another possible source is the proximity to II National Road, where a big number of trucks with animals running by.

NUMBER OF OUTBREAK: **40/97**

The farm is located in the municipality of Torregrossa, being the me same municipality than outbreaks, 2, 3, 4, 5, 6, 8, 9, 10, 11, 20, 21, 24, 27, 28, 30, 31, 33 and 38.
The probably source of the disease into the holding is the relations with their integrated enterprise, being the same for the outbreak numbers 30, 31, 36 and 37 recently.

NUMBER OF OUTBREAK: **41/97**

The farm is located in the municipality of Puiguerd de Lleida.
The probably source of the disease into the holding is the veterinarian, who had visited other farms with problems: Outbreaks 23, 27, 32, 33, 38 and 39.

NUMBER OF OUTBREAK: **42/97**

The farm is located in the municipality of Linyola, being the same municipality than the outbreak numbers, 15, 17, 19, 23, 25, 26 and 34. The probably source of the disease into the holding is the relations withe their integrated interprise, being the same for the outbreak numbers 25 and 26..
Another probably source is the proximity from the outbreak number 15 (800 metres).

NUMBER OF OUTBREAK: **43/97**

The farm is located in the municipality of Ivars the Urgell.
The probably source of the disease into the holding is the relations with their integrated enterprise, being the same for the outbreak numbers 23, 27, 32, 33, 38, 39 and 41.

NUMBER OF OUTBREAK: **44/97**

The farm is located in the municipality of Sarroca de Lleida.
The probably source of the disease into the holding is the relations with their integrated enterprise being the same for the outbreak numbers 36, 37 and 40.
This farmer has another holding in the same municipality, attending both diary. For this reason second holding have been depopulated.
This farmer, takes the slurry from the neighbouring farms including another municipalities, distributing them in several farms, into and out the municipality.
The farmer works in a bar meeting many people who have participated in charges of trucks, transports, sacrifices, etc.

NUMBER OF OUTBREAK: **45/97**

The farm is located in the municipality of Els Alamús, being the same municipality than the outbreak numbers 29 and 37. The probably source of the disease into the farm is the burial of animals sacrificed in the outbreak number 22 in the proximity of the farm (600 – 800 metres).

Another probably source is the integrated entrerprise of the outbreak number 28.

NUMBER OF OUTBREAK: **46/97**

The farm is located in the municipality of Lleida.
The probably source of the disease is under studying.

NUMBER OF OUTBREAK: **47/97**

The farm is located in the municipality of Vilanova de la Barca.
The probably source of disease is the integrated enterprise of the outbreak number 35.

NUMBER OF OUTBREAK: **48 /97**

The farm is located in the municipality of Arbeca.
The probably source of disease into the farm are trucks of a concrete enterprise in Juneda, near from the outbreak number 32.
This enterprise gave materials for the construction of a new grave of slurry in several times since the first of May until 20th of May.
One person who works in the construction of this grave, works in another farms into the municipality (this farm was visited and no sanitary problem was detected).
Another probably source is a farmer from the municipality of Puiggrós, who works into this farm (precautory sacrificed with negative results).
Another probably source are trucks that gave feedstuffs and the veterinary of this enterprise, being the same one than outbreak numbers 23, 27, 32, 33, 38, 39, 41 and 43 concerning movement of vehicles, the farm is crossed by a local road.

NUMBER OF OUTBREAK: **49 /97**

The farm is located in the municipality of Les Borges Blanques.
The probably source of disease into the farm are the trucks that transported feeddtuffs or the veterinary of this enterprise including the farms for outbreak numbers 23, 27, 32, 33, 38, 39, 41, 43 and 48.

NUMBER OF OUTBREAK: **50/97**
The farm is located in the municipality of Vilanova de la Barca.
The probably source of the entry of the disease in the farm is that the farmer's son participated in several loadings in pig farms distributed in the whole province and every day he went to his farms for taking care of the animals.
Another probably source is that the farm is close to the outbreak number 47 (1000 m) and there are dominat winds in such direction.
This farm works as a little integrated enterprise distributing feedstuff to 17 farms. The feedstuff is elaborated in a holding adjacent to the farm; such activity was stopped immediately. All the farms visited by the lorries of feedstuff during the last month have been checked with negative results.

NUMBER OF OUTBREAK: **51/97**

The farm is located in the municipality of Bell-Lloc d'Urgell, the same one where outbreak numbers 1, 7, 14, 18, 22, 35 and 39 are located.
The probably source of the entry of the disease in the farm is the lorries of feedstuff, because such enterprise includes the farms where outbreak numbers 23, 27, 32, 33, 38, 39, 41, 43 and 48 were declared.
Another probably source is the entry of a lorry for the extraction of slurry about 30 days before the first symptoms., appeared.

NUMBER OF OUTBREAK: **52/97**

The farm is located in the municipality of Juneda, the same where outbreak numbers 32 and 36 are located.
The probably source of the entry of the disease in the farm is the farm is closed to the outbreak number 36 (800 m).
The integrated enterprise which works for this farm is the one that works for the farms outbreak numbers 30, 31, 36 and 37 recently.
Relating to the contact with vehicles the farm is located in a road with a lot of traffic because there are more than 6 farms in the zone.

NUMBER OF OUTBREAK: **53/97**

The farm is located in the municipality of Bell-Loc d'Urgell the same one where outbreak number 43 is located.
The probably source of the entry of the disease in the farm is due to the tracks with gave feedstuff or because the veterinarian of such enterprise that includes the farms where outbreak numbers 23, 27, 32, 33, 38, 39, 41, 43, 48, 49 and 51, have occurred.
Another probably source is the location of the farm which is in the way to the grave in such municipality for elimination of sacrificed animals because of CSF. On 4th of June one farmer loaded animals to go to that place.

NUMBER OF OUTBREAK: **54 /97**

The farm is located in the municipality of Vicfred (Sant Guim de la Plana).
The probably source of disease into the farm could be animals coming from outbreak number 57.

NUMBER OF OUTBREAK: **55 /97**

The farm is located in the municipality of Linyola, being the same municipality than outbreak numbers 15, 17, 19, 23, 25, 26, 34 and 42.
The probably source of disease into the farm is the proximity to affected farms located in the town centre. These farms spread the manure over agricultural land arround the city.
This explains the probably infection from and towards this farm.

NUMBER OF OUTBREAK: **56 /97**

The farm is located in the municipality of Linyola, being the same municipality than outbreak numbers 15, 17, 19, 23, 25, 26, 34, 42 and 55.
The probably source of disease into the farm is the proximity to outbreak number 34 (200 metres).
This farm is located in the town Centre as well, with the same commentary that the outbreak number 55.

NUMBER OF OUTBREAK: **57 /97**

The farm is located in the municipality of Els Plans de Sió.
The probably source of disease into the farm are vehicles used for several works in the pregnancy locals of the farm.
Another probably source is the owner's nephew who is a veterinarian or some breedings sows without identification although the farmer says that they are replacement breeding animals coming from the mentioned farm.

NUMBER OF OUTBREAK: **58 /97**

The farm is located in the municipality of Massoteres.
The probably source of disease into the farm is the proximity (500 – 600 metres) between the grave of this farm and the grave used by the farm of outbreak number 54. Both farms used graves far from their buildings.

NUMBER OF OUTBREAK: **59 /97**

The farm is located in the municipality of Térmes.
The probably sources of disease into the farm are under studying.
This farm has an agricultural land with a distance of 200 metres near to the approaching road to a rendering plant.

NUMBER OF OUTBREAK: **60 /97**

The farm is located in the municipality of Alcarrás.
The probably source of disease into the farm is the proximity (20 metres) to the road used by trucks with a plant for their cleaning and desinfection.
Another probably source is the proximity to a petrol station where a lot of trucks are parked.

NUMBER OF OUTBREAK: **61 /97**

The farm is located in the municipality of Linyola, being the same municipality than the outbreak numbers 15, 17, 19, 23, 25, 26, 34, 42, 55 and 56.
The probably source of disease into the farm is the proximity with CSF affected farms located in the town centre, as well.

These farms spread the manure over agricultural land arround the city this explain the probably infection from and towards this farm.
The farmer says that a vehicle transporting slurry stoped in the entrance of this farm some weeks.

NUMBER OF OUTBREAK: **62 /97**

The holding is located in the municipality of Sant Guim de Freixenet.
The possible source of the disease in the holding is the use of agricultural maquinery coming from the holding declared as outbreak 58, in Massoteres.

NUMBER OF OUTBREAK: **63 /97**

The holding is located in the municipality of La Sentiu de Sió.
The possible source of the disease into the farm are feeding trucks for poultry. These trucks belong to an enterprise related to the holding which is the same of many outbreaks.
Precautory sacrifices because unloading pigs from this farm:
Ponts (after outbreak 64) 2007 piglets.
El Gos - 863.
Oliola – 2.683 fattenig pigs. Comercial relations with "El Gos".
Oliola – 910 fattenig pigs. Same worker than the last farm.

NUMBER OF OUTBREAK: **64 /97**

The holding is located in the municipality of Ponts.
The possible source of the disease into the farm is the entry of animals coming from the outbreak number 63.
Precautory sacrifices for familiar relations:
Ponts 1.393 animals (2 boars, 494 breeding sows and 897 piglets).

NUMBER OF OUTBREAK: **65 /97**

The holding is located in the municipality of Almenar being the same municipality than the outbreak numbers 97/69, 97/70, 97/71 and 97/72.
The probably source of disease into the farm is unknown and remains under study.
Precautory sacrifices because same supplier:
Almatret (after outbreak 67).

NUMBER OF OUTBREAK: **66 /97**

The farm is located in the municipality of Agramunt, being the same municipality than the outbreak number 68.
The probably source of disease into the farm is worker taking part in the unloading of piglets for outbreak number 97/65.
Precautory sacrifices because unloading pigs from this farm:
Les Borges Blanques 1.209.

Tárrega 2.295.
Tornabous 676.
Arbeca 1.558.
La Donzell (Agramunt) 851.
Total 6.589.

NUMBER OF OUTBREAK: **67 /97**

The farm is located in the municipality of Almatret.
The probably source of disease into the farm is because same supplier as outbreak number 97/65.
Precautory sacrifices because same supplier:
St. Martí de Maldá 2.550.
St Martí de Maldá because same worker than last. 880.
Vilagrassa. 505.

NUMBER OF OUTBREAK: **68 /97**

The farm is located in the municipality of Agramunt, being the same municipality than the outbreak number 66.
The probably source of disease into the farm is proximity (300 metres) to the holding declared as outbreak number 97/66, in Agramunt and the presence of slurry coming from this farm.

NUMBER OF OUTBREAK: **69 /97**

The farm is located in the municipality of Almenar, being the same municipality than the outbreaks number 65, 70, 71 and 72.
The probably source of disease into the farm is because the proximity (600 metres) to the holding declared as outbreak number 97/65.
Furthermore, slurry coming from outbreak number 97/66, which is close to outbreak number 97/68, was thrown out.
Precautory sacrifices into a radio of 500 meters:
Almenar – 6/11/97-793
Almenar- 10/11/97- 472
Almenar – 10/11/97-384
Almenar- 13/11/97- 30
Total- 1.679.

NUMBER OF OUTBREAK: **70 /97**

The farm is located in the municipality of Almenar, being the same municipality than the outbreaks number 65, 69 and 71.
The probably source of disease into the farm is because the relation of integrated enterprise with the holding declared as outbreak number 97/69.

Precautory sacrifices into a radio of 500 meters:
Almenar- 7-8/11/97-1.475.
Almenar- 8/11/97-922
Almenar- 10/11/97-361.
Almenar- 14/11/97-150
Almenar- 13/11/97-45
Total- 3.223.

NUMBER OF OUTBREAK: **71 /97**

The farm is located in the municipality of Almenar, being the same municipality than the outbreaks number 65, 69 and 70.
The probably source of disease into the farm is because the relation of integrated enterprise with the holding declared as outbreak number 97/69 and 97/70.
Precautory sacrifices into a radio of 500 meters:
Almenar- Empty.

NUMBER OF OUTBREAK: **72 /97**

The farm is located in the municipality of Almenar, being the same municipality than the outbreaks number 65, 69, 70 and 71.
The probably source of disease into the farm is because the relation of integrated enterprise with the holding declared as outbreak number 97/69, 97/70 and 97/71.
Precautory sacrifices into a radio of 500 meters:
Almenar- 14/11/97- 814.
Almenar- 18/11/97-200
Almenar- 13/11/97-16.
Alguaire- 14/11/97-1.025
Total- 2.055.

NUMBER OF OUTBREAK: **73 /97**

The farm is located in the municipality of La Fuliola.
The probably source of disease into the farm is under study yet. There are 3 hipotesys:

- pigs bougth in Puigverd de Agramunt.
- The farmer is a hunter and he says to have been in lands where toward little time slurry had been thrown; so the possibility of entrance of disease in this farm could be to have been in contact with slurry coming from some affected farm.
- The farmer shares with other people a slurry vat, although he said that from August this vat didn't enter his farm. Of this vat, one of the owners is a farmer of Tornabous whose animals were sacrificed to be related with the outbreak 97/68 of Agramunt, although the analyses carried out to these pigs following the sacrifice, were negative to C.S.F.

1. Farm 040: FN. Almenar.

Stamped out too due to aa familiar connection with outbreak number 69. Sacrificed animals on the 06/11/97: 793.

2. Farm 040: DN. Almenar.

Sacrificed animals on the 10/11/97: 472.

3. Farm 040: KB. Almenar.

Sacrificed animals on the 10/11/97: 384.

4. Farm 040: AM. Almenar.

Sacrificed animals on the 13/11/97: 30 breeding sows.

Total number of sacrificed animals for relation with outbreak number 69: 1.679.

On the other hand, an epidemiological relation with outbreak numbers 70, 71, and 72, has all of themm belongs to the same integrated enterprise as outbreak number 69.

Outbreak number 70
040: IN. Almenar.

All farms located in a radius of 500 meters from outbreak number 70 have been stamped out:

1. Farm 040: BA. Almenar.

Sacrificed animals on the 07-08/11/97: 1.745.

2. Farm 040: BA. Almenar.

Sacrificed animals on the 08/11/97: 922.

3. Farm 040: DX. Almenar.

Sacrificed animals on the 10/11/97: 361.

4. Farm 040: GC. Almenar.

Sacrificed animals on the 14/11/97: 150 boars.

5. Farm 040: KV. Almenar.

Sacrificed animals on the 13/11/97: 45 boars.

Total number of sacrificed animals for relation with outbreak number 70: 3.223.

Outbreak number 71
040: HL. Almenar.

All farms located in a radius of 500 meters from outbreak number 71 have been stamped out:

The unique farm in the radius is the following:

Farm 040: GV. Almenar.

At the present time, the farm is empty.

Outbreak number 72
040: CR. Almenar.

Farms mentioned below located in a radius of 500 meters from this outbreak, were stamped out:

1. Farm 040: KR. Almenar.

Sacrificed animals on the 14/11/97: 814.

2. Farm 040: ND. Almenar.

Sacrificed animals on the 18/11/97: 200 piglets.

3. Farm 040: LK. Almenar.

Sacrificed animals on the 13/11/97: 16 breeding sows.

The following farm has been also stamped out as the technnician is the same person as for the farm outbreak number 72:

Farm 035: CT. Alguaire.

Sacrificed animals on the 14/11/97: 1.025.

Total number of sacrificed animals in relation with outbreak number 72: 2.055.

ORDEN
de 25 de noviembre de 1997, de modificación de la Orden de 7 de noviembre de 1997, sobre medidas urgentes para la prevención de la peste porcina clásica.

Mediante la Orden de 13 de agosto de 1997, de refundición y actualización de la normativa vigente sobre medidas urgentes para la prevención de la peste porcina clásica (PPC), modificada por las órdenes de 19 de agosto de 1997, de 2 de octubre de 1997, de 20 de octubre de 1997, de 23 de octubre de 1997 y de 7 de noviembre de 1997, se declaraba la presencia de PPC en explotaciones de municipios de Lleida y se establecían zonas de protección y vigilancia alrededor de los focos y medidas específicas para evitar la difusión de la enfermedad.

Ante la aparición de dos nuevos focos de peste porcina clásica en explotaciones de los municipios de Almenar y La Fuliola, es necesario proceder a su declaración, así como a establecer las zonas de protección y vigilancia.

Así mismo, es necesario excluir de las zonas de protección y vigilancia establecidas en la Orden de 7 de noviembre de 1997 aquellas zonas donde los resultados de los controles efectuados en las explotaciones han permitido levantar las medidas y limitaciones establecidas en la Orden de 13 de agosto de 1997.

Basándose en los reales decretos 2459/1996, de 2 de diciembre, por el que se establece la lista de enfermedades de animales de declaración obligatoria y se da la normativa para su notificación, y 2159/1993, de 13 de diciembre, por el que se establecen medidas relacionadas con la peste porcina clásica,

Ordeno:

Artículo 1
Se declara la presencia de dos focos de peste porcina clásica en explotaciones de los términos municipales de Almenar y La Fuliola (Lleida).

Artículo 2
2.1 Se establecen zonas de protección que engloban los focos de la enfermedad, con un radio mínimo de 3 kilómetros, las cuales se delimitan en el anexo 1 de la presente disposición.

2.2 El anexo 1 de la Orden de 7 de noviembre de 1997, de modificación de la Orden de 23 de octubre, sobre medidas urgentes para la prevención de la peste porcina clásica, queda sustituido por el anexo 1 de la presente disposición.

Artículo 3
3.1 Se establecen nuevas zonas de vigilancia que engloban los focos de la enfermedad, con un radio mínimo de 10 kilómetros, las cuales se delimitan en el anexo 2 de la presente disposición.
3.2 El anexo 2 de la Orden de 7 de noviembre de 1997, de modificación de la Orden de 23 de octubre, sobre medidas urgentes para la prevención de la peste porcina clásica, queda sustituido por el anexo 2 de la presente disposición.

Barcelona, 25 de noviembre de 1997

Francesc Xavier Marimon i Sabaté
Consejero de Agricultura, Ganadería y Pesca

Anexo 1

Zona de protección A-1

La zona de protección A-1 comprende:
De la comarca de La Noguera, el término municipal entero de La Sentiu de Sió, y parte del término municipal de Camarasa.

1. Se inicia en la intersección de los términos municipales de Bellcaire d'Urgell, La Sentiu de Sió y Vallfogona de Balaguer.
2. Siguiendo el límite oeste del término municipal de La Sentiu de Sió, dirección norte, hasta la intersección con el límite sur del término municipal de Camarasa.

3. Siguiendo el límite sur del término municipal de Camarasa, en dirección este, hasta la intersección con la carretera C-147.
4. Siguiendo la carretera C-147, dirección noreste, hasta Cal Tecletes.
5. Desde Cal Tecletes, se establece una línea recta, dirección este, hasta Cal Guasc.
6. Desde Cal Guasc, se establece una línea recta, dirección este, hasta Cal Pintabotes.
7. Desde Cal Pintabotes, se establece una línea recta, dirección este, hasta Cal Tomàs de l'Augusto.
8. Desde Cal Tomàs de l'Augusto, se establece una línea recta que, pasando por Cal Monera y La Masia del Pere Pau, llega hasta la intersección con la carretera C-1313.
9. Siguiendo la carretera C-1313, dirección suroeste, hasta la intersección con el límite norte del término municipal de La Sentiu de Sió.
10. Siguiendo el límite norte del término municipal de La Sentiu de Sió, dirección este, después el límite este en dirección sur y el límite sur en dirección oeste, hasta la intersección con el límite este del término municipal de Vallfogona de Balaguer, que es el punto de inicio de la zona delimitada.

Zona de protección A-2

La zona de protección A-2 comprende:
De la comarca de El Segrià, parte de los términos municipales siguientes: Almenar, Alguaire y La Portella.
De la comarca de La Noguera, parte de los términos municipales siguientes: Algerri y Albesa.

1. Se inicia en Pinyana. Desde Pinyana, se establece una línea recta, dirección noroeste, hasta La Pleta de la Cuca.
2. Desde La Pleta de la Cuca, se establece una línea recta, dirección noroeste, hasta El Tossal del Vilarnau.
3. Desde El Tossal del Vilarnau, establecer una línea recta, dirección noreste, hasta Les Granges del Pla del Sas, en el término municipal de Almenar.
4. Desde Les Granges del Pla del Sas, establecer una línea recta, dirección noreste, hasta Les Morreres, en el término municipal de Algerri.
5. Desde Les Morreres, establecer una línea recta imaginaria, dirección sureste, que llegue hasta L'Eral, en el término municipal de Albesa, parándose en el punto donde esta línea se cruza con el límite norte del término municipal de Albesa.
6. Desde este punto, establecer una línea recta, dirección sur, hasta Lo Pont de la Dula, en el término municipal de Albesa.
7. Desde Lo Pont de la Dula, establecer una línea recta, dirección suroeste hasta La Torre del Gatmullat, en el término municipal de La Portella.

8. Desde La Torre del Gatmullat, establecer una línea recta, dirección suroeste, hasta La Granja del Biel, en el término municipal de Alguaire.
9. Desde La Granja del Biel, se establece una línea recta, dirección suroeste, que, pasando por La Torre del Sastre, llega hasta Pinyana, que es el punto de inicio de la zona delimitada.

Zona de protección A-3

La zona de protección A-3 comprende:
De la comarca de L'Urgell, parte de los términos municipales siguientes: Agramunt, Puigverd d'Agramunt y Ossó de Sió.

1. Se inicia en Mafet, en el término municipal de Agramunt.
2. Desde Mafet, se establece una línea recta, dirección este, hasta El Mas l'Hostalric, en el término municipal de Oliola.
3. Desde Mas l'Hostalric, se establece una línea recta, dirección sureste, hasta Les Puelles, en el término municipal de Agramunt.
4. Desde Les Puelles, se establece una línea recta, dirección sureste, hasta Cal Vicenç Mas, en el término municipal de Puigverd d'Agramunt.
5. Desde Cal Vicenç Mas, se establece una línea recta, dirección sur, hasta la intersección de la carretera L-303 con el límite este del término municipal de Puigverd d'Agramunt.
6. Desde este punto, se establece una línea recta, dirección suroeste, hasta Montfalcó d'Ossó, en el término municipal de Ossó de Sió.
7. Desde Montfalcó d'Ossó, se establece una línea recta, dirección suroeste, hasta la intersección de la carretera C-240 con el límite este del término municipal de Puigverd d'Agramunt.
8. Desde este punto, se establece una línea recta, dirección noroeste, hasta El Mas de Muntada, en el término municipal de Agramunt.
9. Desde Mas de Muntada, se establece una línea recta, dirección noroeste, hasta Ca l'Isidori.
10. Desde Ca l'Isidori, se establece una línea recta, dirección norte, hasta El Molí del Segarrenc.
11. Desde El Molí del Segarrenc, se establece una línea recta, dirección noreste, hasta Cal Martorell.
12. Desde Cal Martorell, se establece una línea recta, dirección norte, hasta Mafet, que es el punto de inicio de la zona delimitada.

Zona de protección A-4

La zona de protección A-4 comprende:

De la comarca de El Segrià, parte del término municipal de Almatret.
De la comarca de La Ribera d'Ebre, parte del término municipal de Riba-roja d'Ebre.

1. Se inicia en Mas del Xano, en el término municipal de Almatret.
2. Desde Mas del Xano, se establece una línea recta, dirección este, hasta La Granja de Peret de Florença.
3. Desde La Granja de Peret de Florença, se establece una línea recta, dirección este, hasta Mas de Borra, en el término municipal de Riba-roja d'Ebre.
4. Desde Mas de Borra, se establece una línea recta, dirección sur, hasta Mas de Carlinos.
5. Desde Mas de Carlinos, se establece una línea recta, dirección sur, hasta Mas de Bartolet.
6. Desde Mas de Bartolet, se establece una línea recta, dirección suroeste, hasta Mas de Pota.
7. Desde Mas de Pota, se establece una línea recta, dirección suroeste, hasta Mas del Xaval.
8. Desde Mas del Xaval, se establece una línea recta, dirección noroeste, hasta Mas del Xorro.
9. Desde Mas del Xorro, se establece una línea recta, dirección noroeste, hasta Mas del Teodoro.
10. Desde Mas del Teodoro, se establece una línea recta, dirección norte, hasta Mas del Xano, punto de inicio de la zona delimitada.

Zona de protección A-5

La zona de protección A-5 comprende:

De la comarca de L'Urgell, el término municipal entero de La Fuliola, y parte de los términos municipales siguientes: Castellserà, Agramunt, Tornabous y Puigverd d'Agramunt.
De la comarca de El Pla d'Urgell, parte del término municipal de Ivars d'Urgell.
De la comarca de La Noguera, parte del término municipal de Penelles.

1. Se inicia en Masia Guinella, en el término municipal de Puigverd d'Agramunt.
2. De Masia Guinella, establecer una línea recta, dirección norte, hasta Masia del Font, en el término municipal de Tornabous.
3. De Masia del Font, establecer una línea recta, dirección noroeste, hasta La Masia de la Casa Nova, en el término municipal de Agramunt.
4. De La Masia de la Casa Nova, establecer una línea recta, dirección noroeste, hasta la intersección del canal de Urgell con el límite este del término municipal de Castellserà.

5. Desde este punto, establecer una línea recta, dirección oeste, hasta la ermita de Sant Sebastià, en el término municipal de Castellserà.
6. Desde la ermita de Sant Sebastià, establecer una línea recta, dirección suroeste, hasta la intersección de la carretera C-148 con el límite sur del término municipal de Castellserà.
7. Desde este punto, establecer una línea recta, dirección sur, hasta El Castell del Remei, en el término municipal de Penelles.
8. Desde El Castell del Remei, establecer una línea recta, dirección sur, hasta la intersección de la acequia segunda con el límite norte del término municipal de Ivars d'Urgell.
9. Desde este punto, establecer una línea recta, dirección sureste, hasta la intersección de la acequia segunda con la carretera LV-3344.
10. Siguiendo la acequia segunda, dirección este, hasta la intersección con el límite sur del término municipal de Tornabous.
11. Siguiendo por el límite sur del término municipal de Tornabous, dirección este, hasta la intersección con el límite oeste del término municipal de Barbens.
12. Siguiendo por el límite oeste del término municipal de Barbens, dirección norte, y por su límite norte, dirección este, hasta la intersección con el límite este del término municipal de Puigverd d'Agramunt.
13. Siguiendo el límite este del término municipal de Puigverd d'Agramunt, dirección norte, hasta la intersección con la carretera C-148.
14. Desde este punto, establecer una línea recta, dirección noreste, hasta Masia Guinella, punto de inicio de la zona delimitada.

Anexo 2

Zona de vigilancia A-1

La zona de vigilancia A-1 comprende:
De la comarca de La Noguera, los términos municipales enteros siguientes: Bellmunt d'Urgell, Bellcaire d'Urgell, Cubells, Montgai, la localidad de Gerb, que pertenece al municipio de Os de Balaguer, y Preixens; y parte de los términos municipales siguientes: Alòs de Balaguer, Vallfogona de Balaguer, Les Avellanes i Santa Linya, Balaguer, Camarasa, Castelló de Farfanya, Penelles, Vilanova de l'Aguda, Cabanabona, Oliola, Artesa de Segre i Foradada.
De la comarca de L'Urgell, el término municipal entero de Anglesola, y parte de los términos municipales siguientes: Agramunt, Puigverd d'Agramunt, Ossó de Sió, Castellserà, Tornabous, Tàrrega, Bellpuig y Vilagrassa.
De la comarca de La Segarra, parte de los términos municipales siguientes: Els Plans de Sió y Torrefeta i Florejacs.

De la comarca de El Pla d'Urgell, los términos municipales enteros siguientes: Barbens y Castellnou de Seana, y parte de los términos municipales siguientes: Linyola, Bellvís (la parte que se encuentra entre los municipios de Vallfogona de Balaguer, Bellcaire d'Urgell y Linyola), Ivars d'Urgell y Vila-sana.

1. Se inicia en la intersección de la carretera C-148 con la línea ficticia que une Les Granges del Parrot (Castelló de Farfanya) con La Torre dels Lladres (Balaguer).
2. Desde este punto, se establece una línea recta, dirección norte, hasta Canvim, situado en el término municipal de Les Avellanes i Santa Linya.
3. Desde Canvim, se establece una línea recta, dirección noreste, hasta Santa Margarida de Privà.
4. Desde Santa Margarida de Privà, se establece una línea recta, dirección este, hasta la presa de Camarasa.
5. Desde la presa de Camarasa, se establece una línea recta, dirección este, hasta La Cabana de Ginera, en el término municipal de Alòs de Balaguer.
6. Desde La Cabana de Ginera, se establece una línea recta, dirección sureste, hasta Coberts dels Estrulls.
7. Desde Coberts dels Estrulls, se establece una línea recta, dirección sureste, hasta la intersección de los términos municipales de Alòs de Balaguer, Cubells y Foradada.
8. Siguiendo por el límite este del término municipal de Cubells, dirección sur, hasta la intersección con el límite este del término municipal de Montgai.
9. Desde este punto, se establece una línea recta, dirección noreste, hasta La Vinyasa, en el término municipal de Foradada.
10. Desde este punto, se establece una línea recta, dirección noreste, hasta Casa de Siscosa, en el término municipal de Artesa de Segre.
11. Desde Casa de Siscosa, se establece una línea recta, dirección sureste, hasta La Masia Nova de Pedrós.
12. Desde La Masia Nova de Pedrós, establecer una línea recta, dirección sureste, hasta Mas d'en Puig, en el término municipal de Oliola.
13. Desde Mas d'en Puig, establecer una línea recta, dirección sureste, hasta Mas d'en Vall, en el término municipal de Cabanabona.
14. Desde Mas d'en Vall, se establece una línea recta, dirección sureste, hasta El Castell de les Sitges, en el término municipal de Torrefeta i Florejacs.
15. Desde El Castell de les Sitges, se establece una línea recta, dirección sur, hasta El Castell del Molí, en el término municipal de Els Plans de Sió.
16. Desde El Castell del Molí, se establece una línea recta, dirección suroeste, hasta la ermita de Sant Marçal, en el término municipal de Tàrrega.
17. Desde la ermita de Sant Marçal, se establece una línea recta, dirección suroeste, hasta Altet.
18. Desde Altet, establecer una línea recta, dirección suroeste, hasta Mas d'en Colom.

19. Desde Mas d'en Colom, establecer una línea recta, dirección suroeste, hasta Les Tosses, en el término municipal de Vilgrassa.
20. Desde Les Tosses, establecer una línea recta, dirección suroeste, hasta El Tossal del Poe, en el límite de los términos municipales de Bellpuig y Preixana.
21. Desde El Tossal del Poe, establecer una línea recta dirección noroeste hasta La Font de la Llúpia.
22. Desde La Font de la Llúpia, siguiendo el límite sur del término municipal de Castellnou de Seana, dirección oeste, hasta la intersección con el límite sur del término municipal de Vila-sana.
23. Desde este punto, establecer una línea recta, dirección noroeste, hasta La Torre del Carulla, en el término municipal de Vila-sana.
24. Desde La Torre del Carulla, establecer una línea recta, dirección noroeste, hasta Torre Formiguera, en el término municipal de Linyola.
25. Desde Torre Formiguera, establecer una línea recta, dirección norte, hasta Cal Serra.
26. Desde Cal Serra, establecer una línea recta, dirección noroeste, hasta Ca l'Alegret, en el término municipal de Vallfogona de Balaguer.
27. Desde Ca l'Alegret, establecer una línea recta, dirección oeste, hasta Torre Batallo, y prolongar la línea hasta el límite oeste del término municipal de Vallfogona de Balaguer.
28. Siguiendo el límite oeste del término municipal de Vallfogona de Balaguer, dirección noroeste, hasta la intersección con el límite del término municipal de Balaguer.
29. Desde este punto, se establece una línea recta, dirección oeste, hasta Torre de Baldomar.
30. De Torre de Baldomar, se establece una línea, dirección noroeste, hasta El Corb.
31. Desde El Corb, se establece una línea recta, dirección norte, hasta Torre del Julio.
32. De Torre del Julio, se establece una línea recta, dirección norte, hasta el punto de inicio de la zona delimitada.

Zona de vigilancia A-2

La zona de vigilancia A-2 comprende:
De la comarca de El Segrià, los términos municipales enteros siguientes: Alfarràs, Torrefarrera, Vilanova de Segrià, Torre-serona, Benavent de Segrià y La Portella; y parte de los términos municipales siguientès: Almenar, Alguaire, Almacelles, Alpicat y Corbins.
De la comarca de La Noguera, el término municipal entero de Albesa, y parte de los términos municipales siguientes: Ivars de Noguera, Algerri, Castelló de Farfanya, Torrelameu y Menàrguens.

1. Se inicia en Alpicat. Desde Alpicat, siguiendo la carretera que sale en dirección este hasta Roselló y Torrefarrera hasta la intersección con el límite este del término municipal de Alpicat.
2. Siguiendo el límite este del término municipal de Alpicat, dirección norte, hasta la intersección con el límite sur del término municipal de Torrefarrera.
3. Siguiendo el límite sur del término municipal de Torrefarrera, dirección este, hasta la intersección con el límite sur del término municipal de Torre-serona.
4. Siguiendo el límite sur del término municipal de Torre-serona, dirección este, y después su límite este, dirección norte, hasta la intersección con el límite este del término municipal de Benavent de Segrià.
5. Desde este punto, se establece una línea recta, dirección noreste, que, cruzando el término municipal de Corbins, llega hasta La Font de la Perdiu, situada en el término municipal de Torrelameu.
6. Desde La Font de la Perdiu, se establece una línea recta, dirección noroeste, hasta El Tossal Gros.
7. Desde El Tossal Gros, se establece una línea recta, dirección norte, hasta encontrar la intersección del límite norte del término municipal de Torrelameu con el límite este del término municipal de Albesa.
8. Desde este punto, establecer una línea recta, dirección noreste, hasta Les Granges de Torredà, en el término municipal de Castelló de Farfanya.
9. Desde Les Granges de Torredà, establecer una línea recta, dirección noroeste, hasta La Font Ribera, en el término municipal de Castelló de Farfanya.
10. Desde La Font Ribera, establecer una línea recta, dirección noroeste, hasta La Tossa, en el término municipal de Algerri.
11. Desde La Tossa, establecer una línea recta, dirección oeste, hasta El Tossal Roig, en el término municipal de Ivars de Noguera, y prolongar esta línea hasta encontrar el límite oeste del término municipal de Ivars de Noguera.
12. Siguiendo por el límite oeste del término municipal de Ivars de Noguera, dirección sur, hasta la intersección con el límite norte del término municipal de Alfarràs.
13. Siguiendo por el límite norte del término municipal de Alfarràs, dirección oeste, y después su límite oeste, dirección sur, hasta la intersección con el límite oeste del término municipal de Almenar.
14. Siguiendo el límite oeste del término municipal de Almenar, dirección sur, hasta la intersección con el límite norte del término municipal de Almacelles.
15. Desde este punto, se establece una línea recta, dirección sur, hasta Pedregals.
16. Desde Pedregals, se establece una línea recta, dirección sur, hasta Mas del Lleó.
17. Desde Mas del Lleó, se establece una línea recta, dirección sureste, hasta Mas del Mateu.
18. Desde Mas del Mateu, se establece una línea recta, dirección sureste, hasta la intersección del límite este del término municipal de Almacelles con el límite

sur del término municipal de Torrefarrera (parte de Torrefarrera situada entre Almacelles, Alguaire, Vilanova de Segrià y Alpicat).
19. Siguiendo por el límite sur del término municipal de Torrefarrera, delimitado anteriormente, hasta la intersección con el límite oeste del término municipal de Alpicat.
20. Desde este punto, se establece una línea recta, dirección sureste, hasta Alpicat, que es el punto de inicio de la zona delimitada.

Zona de vigilancia A-3

La zona de vigilancia A-3 comprende:
De la comarca de El Segrià, parte de los términos municipales siguientes: Almatret, Seròs y Maials.
