B: VETERINARY HEALTH AND MEAT INSPECTION CERTIFICATE

I,a **veterinarian** authorised thereto by the Veterinary Authority of the Republic of South Africa hereby certify that the venison described in **Section A:**

B1. Animal Health Requirements:

- 1. Was derived from animals which:
 - 1.1 are of game species and of South African origin
 - 1.2 originate from the OIE recognized Foot and Mouth Disease free zone of South Africa and from farms not under veterinary restriction for FMD control or any disease to which the species is susceptible.
 - 1.3 originate from farms where no buffalo are kept
 - 1.4 after due enquiry and to the best of my knowledge were not exposed to any infectious or contagious diseases during slaughter
 - 1.5 were not slaughtered as part of a disease eradication campaign

B2. Veterinary Public Health Requirements

- 1. The carcasses from which the meat was derived were subjected to post-mortem veterinary inspection, found to be free from signs of disease and that such carcasses or meat are sound and wholesome and unconditionally passed fit for human consumption.
- 2. The carcasses and the meat handled/cut/processed and packed, at the establishment(s) mentioned in section A, being an establishment(s) recommended by the National Director of Veterinary Services for export to Namibia;
- 3. In the case of cuts, the markings on the packaging/wrapping bear the official inspection stamp of the slaughtering/cutting plant at which the animals were slaughtered and the meat handled. The marks on the meat are only made with safe, edible ink approved by the Director of Public Health and the slaughter date must be clearly marked on all packaging.

Slaughter date

- 4. At the time of loading, the meat complied with one of the following temperature requirements:
 - meat and offal stored for less than 3 months was maintained at minus 10°C or less
 - meat and offal stored for longer than 3 months was maintained at minus 18°C or less
 - Chilled meat was maintained at between 0°C and 7°C
- 5. Exposed meat and cartons were not loaded together (in the same load space)
- 6. The vehicle transporting the meat conforms to accepted standards of cleanliness, construction, maintenance and operation and the meat was loaded and the truck/container sealed immediately after loading at the approved facility, under my supervision.
