

APPENDIX N°5

**REPUBLIC DE CHILE
MINISTRY OF AGRICULTURE**

REGULATION FOR THE ERRADICACION OF THE SWINISH PEST

SANTIAGO, 19 FEBRUARY OF 1996

N° 32 / In view: That prepared in the Law N°18.755, modified by the Law N°19.283; in the D.F.L. R.R.A. N°16 of 1963 that it establishes norms have more than enough Animal Sanity; in the Ordinance N°318, of 1925, of the Ministry of Agriculture; in the Organic DFL N°294 1960, of this Secretary of State and in article 32 N°8 of the Political Constitution of the Republic; and

CONSIDERING:

That, the Classic Swine Fever is a disease of obligatory declaration and control for the Ordinance N°318, of 1925, of this Secretary of State.

That the program of control of the Classic Swine Fever, developed by the Agricultural and Cattle Service, it has arrived to a stage in that the conditions are given for beginning a process orient to their eradication;

That for this effect, it is necessary norms that regulate the application of specific measures for the eradication of the diseases.

DECRET:

GENERAL DISPOSITIONS

Article 1. - The eradication of the denominated diseases Classic Swine Fever will be made of agreement with the norms of this Regulation.

In all the cases in that this Regulation uses the words "the Service", it will understand each other that refers to the Agricultural and Livestock Service.

Article 2. - The owners or forks of pigs livestock will maintain the confined pigs, inside farms, conserving the fences, demarcations and doors that it corresponds under conditions that they impede the exit of those.

The Service will be able to apply the measures to that it refers the article N°9 of the DFLRRA N°16 1963, to the pigs that are in the public road, landfills, riverside of rivers or any other place that it doesn't fulfill the demands of the previous paragraph.

The expenses that it demands the execution of the suitable sanitary measures will be of the owner's position or fork of the pigs.

Article 3. - All waste female or discard that they send the Industrial Facilities going to slaughterhouse or auction place they will be identified with the number of registration of the Facility.

Article 4. - In the guide of Free Traffic that aids the transport of the pigs the following information it will be consigned.

- a) origin farm (with their serial number)
- b) place and destination establishment
- c) number and category of the pigs

Article 5. - The feeding of pigs is prohibited with waste of animal origin, coming from slaughterhouses, restaurants, hospitals, casinos or other establishments, unless for expressed and founded resolution that it authorizes by the Service.

Also it prohibits feed pigs with waste coming from places of final disposition of garbage.

Article 6. - The Service will establish a diagnosis system, on the base of sampling of waste females of discard in slaughterhouses and of biological markers, to determine the positive or negative farms to the pathogenic virus of the Classic Swine Fever.

Article 7. - The Service will be authorized to declare free of Classic Swine Fever those farms in that the diagnostics tests prescribed demonstrate the absence of the pathogenic virus.

The Service will also be able to declare Free Areas of the Classic Swine Fever, those in that the epidemic conditions are given that make it reasonable. The rest of the territory will be considered eradication area of the diseases.

OF THE FREE AREAS

Article 8. - One will only be able to enter to the declared areas free of Classic Swine Fever, the susceptible animals of being carriers of this diseases that come from a declared country free of her for the International Office of Epizooties, or of declared national farms free of agreement with this regulation.

The execution of these circumstances will be credited by the respective sanitary certificate, emitted by the Service.

Article 9. - The entrance, elaboration, holding, sale and application of serums and bovine specific against the Classic Swine Fever, is prohibited in declared areas free of the diseases.

Article 10. - One will only be able to disembark in the declared area free of Classic Swine Fever, the remains of food coming from vehicles of transport, in sealed containers and going to the incineration under control of the Service.

Article 11. - The compartments and cellars of the vehicles of transport products that cannot be introduced in to the free areas, they will be sealed while the vehicles remain in the free area.

Article 12. - If you will check a focus of Classic Swine Fever in declared area free of the diseases, the Regional Director corresponding of the Service will be able to adopt the following measures:

- a) Slaughtering and destruction of all the existent pigs in the affected farm.
- b) Declaration of Quarantine to the affected farm.
- c) Prohibition or restriction of the transport of pigs or products that can be infection vehicle.
- d) Laundry and disinfection of all the dependencies of the farm and objects that had been in contact with sick animals.

OF THE ERADICATION AREA.

Article 13. - In the eradication area the vaccination will be allowed against the Classic Swine Fever, as method of prevention. The used Vaccine will fulfill the norms settled down by the Service.

Article 14. - The farms in that it is proven the presence of the pathogenic virus will eliminate all the pigs, according to the reparation method that indicates the Service. While it puts on in execution this method, the only destination of the pigs of the farms will be the slaughterhouse.

Article 15. - The farms that are negative to the diagnostic system will reinforce their bioseguridad measures, it stops then to proceed to the retirement of the vaccine swine anti-pest, according to the eradication plan approved by the Service.

Article 16. - The genetic swine farm with sale to public and the farms that sell pigs to be raised also or put on weight in another farms, they will possess the condition of free of Classic Swine Fever.

Article 17. - If is proven a focus of Classic Swine Fever, in eradication area, the Regional Director will adopt the following measures:

- a) Slaughtering and destruction of all the pigs of the respective farm.
- b) quarantine of the farm.
- c) destruction of the elements that can be infection vehicle
- d) laundry and disinfection of the farm.

Article 18. - If pigs appeared with symptoms that make suspect the presence of a red diseases in a livestock auction, the Veterinary Doctor of the auction place it will communicate immediately to the nearest Office in the Service, so that this adopts the corresponding sanitary measures.

It will understand each other for red diseases of the pig, the following pathologies: Classic Swine Fever, Erisipela, Salmonella, and Pasteurella.

Article 19. - In the eradication area, the action pigs off auction place will have as only destination a slaughterhouse located inside the same area.

Article 20. - It will correspond to the Service to investigate the application of this Regulation and to sanction to the offenders.

SCORE, TAKE REASON AND COMMUNICATE.

**EDUARDO FREI RUIZ-TAGLE
PRESIDENT OF THE REPUBLIC**

**EMILIANO ORTEGA RIQUELME
MINISTER OF AGRICULTURE**
