

**APPLYING FOR PERMIT TO IMPORT MATERIAL SUBJECT TO
POSTENTRY QUARANTINE**

- The material listed in the lower left-hand portion of this circular is enterable under permit, subject to growing under *postentry quarantine restrictions*.
- The conditions for growing plant material under postentry quarantine are set forth in the enclosed growing agreement, PPQ Form 546, which together with the application for permit, PPQ Form 587 (MD), *enclosed only if required*, must be completed and signed by the applicant. The signature on both the growing agreement and the application for permit must be the applicant's, whether the applicant is an individual (if the material is to be grown by an individual), the owner or manager of a nursery, or a responsible person of an institution. Permits are issued *only* to persons who will grow the plants on premises under their supervision and control. Until the material is given a final release, the grower (permittee) will be held responsible for our requirements. Others having an interest in the material will be of no concern to us as long as they do not interfere with the grower's obligations under the terms of the agreement with our service.
- The name and street address at bottom of Form 587 (MD) and Section A, Item 1, of Form 546, must be the same. The address where the material will be grown (*Item 5, 546*) may differ from the permit street address. The location shown as the growing location on the agreement must be so described that the inspector will have no difficulty in finding the premises. Rural mail route numbers and P.O. box numbers are not acceptable for the growing location.
- Shipments of material subject to postentry quarantine must be consigned to the permittee. Permittees may not combine orders with any other person and have material shipped and entered under one permit. No postentry material will be allowed to proceed from the port of entry inspection station until permit requirements have been completed and plants are tagged for the designated growing site(s).

Material: _____

(Reminder - Quantity and origin of plants are to be given in Section A of PPQ Form 546)
