

Dear Applicant/Permit Holder:

If you import plants, plant parts, and seeds into the United States under a U.S. Department of Agriculture (USDA) permit (*PPQ Form 597*) required under USDA regulations, you may also require additional permits under provisions of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). Documentation required under CITES Regulations is separate and distinct from documentation required under USDA plant quarantine regulations.

A General Permit (*PPQ Form 622*) to engage in business is required of individuals or companies engaging in the business of importing, exporting, or reexporting terrestrial plants listed in the CITES regulations or the U.S. Endangered Species Act. If you require the General Permit, applications (*PPQ Form 621*) can be obtained from the Permit Unit, Plant Protection and Quarantine, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, 4700 River Road, Unit 136, Riverdale, Maryland 20737.

Plants listed as *Appendix I* (except those that are artificially propagated) intended for importation into the United States must have a CITES import permit issued by the U.S. Fish and Wildlife Service, Office of Management Authority, P.O. Box 3507, Arlington, Virginia 22203-3507. The phone number is Area Code (703) 358-2104.

Plants listed as *Appendix II* do not require the CITES import permit. They do, however, require an export or re-export permit or an export certificate of artificial propagation from the country of origin. To determine the foreign agency from which to obtain the required export documents, please contact the U.S. Fish and Wildlife Service at the above address. CITES plants which arrive in the United States without the required CITES documentation will be detained at the port of arrival.

If you plan to export U.S. origin CITES plants, you can obtain an export permit from the U.S. Fish and Wildlife Service. If you plan to re-export foreign origin plants, you can obtain a re-export certificate from the same office.

Sincerely,

Deborah Knott

The above list and the following paragraphs include changes effective June 11, 1992.

The abbreviation "spp." is used to denote all species of a higher taxon.

An asterisk (*) placed against the name of a species or higher taxon indicates that one or more geographically separate populations, subspecies or species of that species or taxon are included in Appendix I and are excluded from Appendix II.

Two asterisks (**) placed against the name of a species or higher taxon indicate that one or more geographically separate populations, subspecies or species of that species or taxon are included in Appendix II and are excluded from Appendix I.

The symbol (-) followed by a number placed against the name of a species or higher taxon denotes that designated geographically separate populations, species, groups of species, or families of that species or taxon are excluded from the appendix concerned as follows:

- 113 Population of Chile
- 114 All species that are not succulent

The symbol (+) followed by a number placed against the name of a species or higher taxon denotes that only designated geographically separate populations, subspecies or species of that species or taxon are included in the appendix concerned as follows:

- +217 Population of Chile

The symbol (=) followed by a number placed against the name of a species or higher taxon denotes that the name of that species or taxon shall be interpreted as follows:

- = 376 Also referenced as *Podophyllum emodi*
- = 377 Also referenced in genus *Echinocactus*
- = 378 Also referenced in genus *Escorbaria*
- = 379 Also referenced as *Lobeira macdougallii* or as *Nopalxochia macdougallii*
- = 380 Also referenced as *Echinocereus lindsayi*

- = 381 Also referenced as *Wilcoxia schmollii*
- = 382 Also referenced as *Solisia pectinata*
- = 383 Also referenced as *Backebergia militaris*
- = 384 Also referenced in genus *Toumeyia*
- = 385 Also referenced in genus *Toumeyia* or in genus *Sclerocactus*
- = 386 Also referenced as *Ancistrocactus tobuschii*
- = 387 Also referenced in genus *Neolloydia* or in genus *Echinomastus*
- = 388 Also referenced in genus *Neolloydia*
- = 389 Also referenced as *Saussurea lappa*
- = 390 Also referenced as *Engelhardia pterocarpa*
- = 391 Includes families *Apostasiaceae* and *Cypripediaceae* as subfamilies *Apostasioideae* and *Cypripedioideae*
- = 392 Also referenced as *Lycaste virginalis* var. *alba*
- = 393 Also referenced as *Sarracenia rubra jonesii*
- = 395 Includes synonym *Stangeria paradoxa*
- = 396 Includes synonym *Welwitschia bainesii*
- = 504 Tissue cultures and flaked seedling cultures are not subject to the provisions of the Convention

In accordance with Article I¹, paragraph b, sub-paragraph (iii), of the Convention, the symbol (#) followed by a number placed against the name of a species or higher taxon included in Appendix II designates parts or derivatives which are specified in relation thereto for the purposes of the Convention as follows:

- #1 Designates all parts and derivatives, except:
 - a) seeds, spores, and pollen (including pollinia); and
 - b) tissue cultures and flaked seedling cultures
- #2 Designates all parts and derivatives, except:
 - a) seeds and pollen;
 - b) tissue cultures and flaked seedling cultures; and
 - c) chemical derivatives

¹ ARTICLE I
Definitions

For the purpose of the present Convention, unless the context otherwise requires:

- (a) "Species" means any species, subspecies, or geographically separate population thereof;
- (b) "Specimen" means:
 - (i) any animal or plant, whether alive or dead;

(ii) in the case of an animal: for species included in Appendices I and II, any readily recognizable part or derivative thereof and for species included in Appendix III, any readily

- recognizable part or derivative thereof specified in Appendix III in relation to the species; and
- (iii) in the case of a plant: for species included in Appendix, any readily recognizable part or derivative thereof and for species included in Appendices II and III, any readily recognizable part or derivative thereof specified in Appendices II and III in relation to the species;
 - (c) "Trade" means export, re-export, import, and introduction from the sea;
 - (d) "Re-export" means export of any specimen that has previously been imported;
 - (e) "Introduction from the sea" means transportation into a State of specimens of any species which were taken in the marine environment and not under the jurisdiction of any State;
 - (f) "Scientific Authority" means a national scientific authority designated in accordance with Article IX;
 - (g) "Management Authority" means a national management authority designated in accordance with Article IX;
 - (h) "Party" means a State for which the present Convention has entered into force.

#3 Designates roots and readily recognizable parts thereof

#4 Designates all parts and derivatives, except:

- a) seeds and pollen;
- b) tissue cultures and flasks seedling cultures;
- c) fruits and parts and derivatives thereof naturalized or artificially propagated plants; and
- d) separate stem joints (pads) and parts and derivatives thereof of naturalized or artificially propagated plants of the genus *Opuntia* subgenus *Opuntia*

#5 Designates saw-logs, sawn wood, and veneers

#6 Designates all parts and derivatives, except:

- a) seeds and pollen
- b) tissue cultures and flasks seedling cultures; and
- c) separate leaves and parts and derivatives thereof of naturalized or artificially propagated plants of the species *Aloe vera*

#7 Designates all parts and derivatives, except:

- a) seeds and pollen (including pollinia);
- b) tissue cultures and flasks seedling cultures;
- c) cut flowers of artificially propagated plants; and
- d) fruits and parts and derivatives thereof of artificially propagated plants of the genus *Vanilla*

#12 As none of the species or higher taxa of FLORA included in Appendix I is annotated to the effect that their hybrids shall be treated in accordance with the provisions of Article III of the Convention, this means that artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of

artificial propagation, and that seeds and pollen (including pollinia), cut flowers, tissue cultures, and flasket seedling cultures of these hybrids are not subject to the provisions of the Convention.
